Book information

Authors: Markus Tröltzsch / Matthias Tröltzsch

Title: 30 Minutes to Augmentation – Set 1

Subtitle: Sinus Floor Elevation Part 1 | Sinus Floor Elevation Part 2 | Ridge Preservation | Guided Bone Regeneration

Short text:

Achieve mastery in oral surgery with the “30 Minutes to…” series. Designed for time-conscious dental professionals, these practical guides offer step-by-step protocols for procedures ranging from extractions to implants. Rooted in cutting-edge research, the books include troubleshooting strategies, clinical tips, and streamlined checklists to ensure confidence and efficiency in every surgery. These volumes are perfect for integrating surgical skills into your practice, as they simplify complex techniques into actionable steps, empowering you to elevate patient care and broaden your expertise.

Sinus Floor Elevation
Part 1: Indications, Basics, and Standard Procedure

Part 1 of this two-part guide covers the basics, providing you with the necessary know-how and taking you through patient cases to demonstrate the practical applications. It is recommended that chapters 1 and 2 are read first, as they contain all the structured information in the form of a textbook. Chapter 3 provides guidance on how to manage patients, and chapter 4 outlines a detailed, step-by-step examination of various cases, putting into practice the knowledge presented in the early part of the guide.

Contents

Chapter 01. Basics
Chapter 02. The procedures
Chapter 03. Medication
Chapter 04. Step-by-step procedures

Stock No. 24531; ISBN 978-1-78698-167-7; Softcover 14.8 x 21 cm
88 pp and 56 illus.
EUR 30

Sinus Floor Elevation
Part 2: Complex Techniques, Overcoming Challenges, Patient Management, and Checklists

Part 2 dives into advanced procedures and complications and provides checklists for implementing the knowledge gained from Part 1. Advanced sinus elevation surgeries are described, including how to assess case difficulty and manage both intraoperative and postoperative complications efficiently. Comprehensive postsurgery care guidelines and helpful checklists are also provided to enhance your practice. The advanced skills you’ll learn and methodologies included will empower you to confidently approach complicated cases.

Contents

Chapter 04. Step-by-step procedures
Chapter 05. Evaluating challenges and managing intraoperative complications
Chapter 06. Postoperative complication management
Chapter 07. Patient-centered procedures
Chapter 08. Finances
Chapter 09. Checklists
Chapter 10. Conclusion

Stock No. 24541; ISBN 978-1-78698-168-4; Softcover 14.8 x 21 cm
72 pp and 36 illus.
EUR 30

Ridge Preservation

Broaden your foundation of successful dental restorations with this comprehensive guide to ridge preservation. This book provides step-by-step procedures for maintaining alveolar ridge integrity, from minor to complex cases. Learn advanced techniques, explore the use of biomaterials such as PRF and collagen membranes, and gain practical tools such as checklists and complication management strategies. Backed by cutting-edge research, this resource empowers dental professionals to optimize patient outcomes with confidence and precision. Elevate your expertise and ensure long-lasting results in implant and restorative dentistry.

Contents

Chapter 01. Basics

Chapter 06. Postoperative complication management
Chapter 07. Checklists
Chapter 08. Conclusion

Stock No. 24551; ISBN 978-1-78698-169-1; Softcover 14.8 x 21 cm
72 pp and 84 illus.
EUR 30

Guided Bone Regeneration (GBR)

This comprehensive guide will help you master the essentials of guided bone regeneration (GBR). Delve into step-by-step protocols, from the fundamentals to advanced techniques such as GBR with reinforcements, ensuring predictable outcomes for alveolar ridge augmentation. Information on materials, patient-centered procedures, and complication management is provided, all of which is backed by the latest scientific research. Detailed checklists and practical tips are included to help you streamline your workflow, enhancing your precision and confidence whether you're managing minor bone deficits or complex cases.
