Title: Interdisciplinary Treatment Planning

Subtitle: The Global Diagnosis System

Short text:

Facially generated treatment planning emphasizes the position of the maxillary central incisors, and the Global Diagnosis system takes this one step further by emphasizing the etiology of abnormal gingival anatomy. Once the etiology is determined, there are only a limited number of treatment options to correct the discrepancy. That is the power of the system: The diagnosis leads to the treatment plan. This completely overhauled second edition is based on the same five CORE questions of the first edition but includes a sixth: Is maxillary hypoplasia present? It welcomes 11 new authors and 16 new chapters, highlighting the use of sophisticated orthodontic, orthopedic, plastic surgery, otolaryngologic, and orthognathic strategies to resolve anatomical irregularities impacting smile design, function, and health. Airway-aware and airway-directed treatment planning is a particular focus, as well as the importance of early intervention in children to redirect aberrant growth as early as possible.

Contents

Chapter 01. Global Diagnosis: The Art and Science of Interdisciplinary Treatment Planning
Chapter 02. Global Analysis Diagnosis Form
Chapter 03. The Five CORE Questions
Chapter 04. The Sixth CORE Question: Is Maxillary Hypoplasia Present?
Chapter 05. Craniofacial and Airway Development in Children: A Growth Modification Guideline
Chapter 06. The Process of Visualization in Treatment Planning
Chapter 07. Orthognathic Surgery: Diagnosing the Face
Chapter 08. Orthognathic Surgery: Treating the Face
Chapter 09. Dental Facial Plastics
Chapter 10. Lip Repositioning
Chapter 11. Facial Plastic Surgery
Chapter 12. Tissue Grafting
Chapter 13. Orthodontic Treatment Planning in Three Dimensions
Chapter 14. Restoratively Guided Orthodontic Treatment: The Preorthodontic Bonding Concept
Chapter 15. The Transverse Dimension: Why Do We Care About It, How Do We Diagnose It, and How Do We Treat It?
Chapter 16. Dentoalveolar Extrusion of the Adult Dentition
Chapter 17. Esthetic Crown Lengthening Surgery: A 30-Year Retrospective and Lessons Learned
Chapter 18. Functional Crown Lengthening
Chapter 19. Restorative Forced Eruption
Chapter 20. Dentoalveolar Extrusion: The Most Difficult Global Diagnosis
Chapter 21. Sequencing the Treatment Plan
Chapter 22. Orthodontic-Periodontic-Restorative Interface: The “Ortho Holiday”
Chapter 23. Digital Diagnosis, Treatment Planning, and Rehabilitation
Chapter 24. Case Studies
Chapter 25. Airway-Aware and Airway-Directed Treatment Planning
Chapter 26. Did You Give The Patience a Chance to Be Healthy? Airway-Aware and Airway-Directed Case Studies
