Book information

Authors: Marc Quirynen / Nelson R. Pinto

Title: Leukocyte- and Platelet-Rich Fibrin in Oral Regenerative Procedures

Subtitle: Evidence-Based Clinical Guidelines

Short text:

This book will guide clinicians to achieve great results with L-PRF. It starts with basic science chapters on tissue regeneration, blood centrifugation, and an explanation of the biologic power of platelet concentrates. However, the true value of this book lies in an evidence-based evaluation of the benefits of L-PRF in periodontal and maxillofacial surgery, as well as in chronic wound therapy. For each treatment, a step-by-step approach has been created by experienced clinicians. The most crucial steps are explained in 18 videos via augmented reality.

Contents

General Introduction to L-PRF: Leukocyte- and Platelet-Rich Fibrin

Part A. Basic Science and Preparation of L-PRF

Chapter 01. Blood Composition and Cellular Characteristics
Chapter 02. Wound Healing
Chapter 03. Centrifugation of Blood via Specific L-PRF Protocols
Chapter 04. General Characteristics and Mode of Action of L-PRF Membranes
Chapter 05. Potential Role of L-PRF in Periodontal Regeneration
Chapter 06. Preparation of Various L-PRF Constructs

Part B. Clinical Applications of L-PRF

Chapter 07. L-PRF as Substitute for Ridge Preservation
Chapter 08. The Use of L-PRF in Sinus Therapy
Chapter 09. The Use of L-PRF During Bone Regeneration Procedures
Chapter 10. Implant Coating with L-PRF to Facilitate Osseointegration
Chapter 11. L-PRF to Promote the Regeneration of Intrabony Defects Around Teeth
Chapter 12. The Use of L-PRF for Periodontal Plastic Surgery
Chapter 13. L-PRF in the Management of Peri-Implantitis
Chapter 14. L-PRF for the Management of MRONJ
Chapter 15. L-PRF Soft-Blocks for Ridge Preservation in Sockets with Major Bone Defects
Chapter 16. Step-by-Step Protocols
Chapter 17. L-PRF for Extraoral Wounds
Epilogue
