

The International Journal of Oral & Maxillofacial Implants

ISSN 0882-2786 (print)
ISSN 1942-4434 (online)

Guidelines for Authors

Acceptable material. Original manuscripts are considered for publication on the condition that they have not been published. Original manuscripts are considered for publication on the condition that they have not been published or submitted for publication elsewhere, including submission to or posting by a preprint repository (except at the discretion of the editors) or submitted for publication elsewhere, including submission to or posting by a preprint repository (except at the discretion of the editors). Manuscripts concerned with reports of basic or clinical research, clinical applications of implant research and technology, proceedings of pertinent symposia or conferences, quality review papers, and matters of education related to the implant field are invited.

Manuscript Submission

Submit manuscripts via JOMI's online submission service: www.manuscriptmanager.net/jomi. Manuscripts should be uploaded as a Microsoft Word (.doc/.docx) file with the images saved as separate high-resolution art files (See "Figures and Tables").

Mandatory Submission Form

The Mandatory Submission Form must be signed by all authors, in the same order as authors are listed on the title page, and uploaded to the online submission service at the time of first submission. The form can be found at: <http://www.quintpub.com/journals/jomi/submission.pdf>

Manuscript Preparation

The journal generally will follow as much as possible the recommendations of the International Committee of Medical Journal Editors in regard to preparation of manuscripts and authorship (Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals; www.icmje.org/recommendations). Nothing in the recommendations should be deemed to indicate that the journal will publish or consider publishing manuscripts that have been submitted to or posted by a preprint repository.

Manuscripts should be double-spaced with at least a one-inch margin all around. Number all pages. Do not include author names as headers or footers on each page.

- **Title page.** The title page should include the title of the article and the name, academic degrees, and professional affiliation of each author. Mailing address and email address must also be provided for the corresponding author. If the paper was presented before an organized group, the name of the organization and the date and location of the presentation should be included.
- **Abstract/Keywords.** The abstract should include a maximum of 350 words. A list of keywords should be provided, not to exceed six. Abstracts for basic and clinical research articles must be structured with the following four sections: Purpose, Materials and Methods, Results, and Conclusion. Abstracts of short communications should also be structured but should be a maximum of 250 words. For all other types of articles (ie, literature reviews, technical and case reports), abstracts should not exceed 250 words and need not be structured.
- **Manuscript length.** The text components of the manuscript (eg, Introduction, Materials and Methods,

Results, Discussion, and Conclusion) should not exceed 4,000 words.

- **Acknowledgments.** Persons who have made substantive contributions to the study can be acknowledged at the end of the article. Also specify grant or other financial support, citing the name of the supporting organization and grant number. Conflict of interest: State any conflict of interest of any of the authors, or include a statement that the authors have no conflict of interest related to the study.
- **Figure legends.** Figure legends should be typed as a group at the end of the manuscript. Detailed but concise legends are encouraged. For photo-micrographs, specify original magnification and stain.
- **Abbreviations.** The full term for which an abbreviation stands should precede its first use in the text unless it is a standard unit of measurement.
- **Trade names.** Generic terms are to be used whenever possible, but trade names and manufacturer should be included parenthetically at first mention.
- **Numbers.** Per SI convention, authors are requested to use decimal points rather than commas for fractional numbers.

References

- All references must be cited in the text, numbered in order of appearance.
- The reference list should appear at the end of the manuscript in numeric sequence.
- Do not include unpublished data (including data from manuscripts posted by a preprint repository) or personal communications in the reference list. Cite such references parenthetically in the text and include a date.
- Avoid using abstracts as references.
- Provide complete information for each reference, including names of all authors (up to six). If the reference is part of a book, also include the chapter title and names of the book's editor(s).

Journal reference style:

1. Roehling S, Gahlert M, Janner S, Meng B, Woelfler H, Cochran DL. Ligature-induced peri-implant bone loss

Figures and Tables

- All figures and tables should be numbered and cited in the text in order of appearance. Tables can be included at the end of the manuscript or uploaded as separate Word documents generally
- All figures must follow the following guidelines:
 - Clinical images should be at least 300 dpi at 3.5 in wide.
 - Images grouped together (eg, 1a–1c) must be saved as individual files (eg, 1a, 1b, 1c).
 - Line art (eg, graphs, charts, line drawings) should be provided as editable vector art (eg, Illustrator or EPS files.)
 - Images containing type should either be saved as a layered file or provided along with a second file with type removed.
- All forest plots will be published online only, as-is, as Appendix Figures.

If after article acceptance the publisher determines that images are of substandard quality for print, authors will be notified that the article will be published in the online edition only unless better images can be provided.

Permissions and Waivers

- Permission must be obtained for the use of copyrighted material (text, photos, drawings) that does not belong to the author.
- Waivers must be obtained for photographs showing persons. When such waivers are not supplied, faces will be cropped to prevent identification.
- Permissions and waivers should be uploaded along with the Mandatory Submission Form.

around loaded zirconia implants. Int J Oral Maxillofac Implants 2019; 34:357–365.

Book reference style:

1. Wang HL, Decker A, Testori T. Maxillary transcranial sinus floor elevation. In: Nevins M, Wang HL (eds). Implant Therapy: Clinical Approaches and Evidence of Success, ed 2. Chicago: Quintessence, 2019:263–278
- **Adherence to guidelines.** Manuscripts that are not prepared in accordance with these guidelines will be returned to the author before review.

Review/Editing of Manuscripts

Manuscripts will be reviewed by the editor-in-chief and will be subjected to blind review by the appropriate associate editor and reviewers with expertise in the field that the article encompasses. The publisher reserves the right to edit accepted manuscripts to fit the space available and to ensure conciseness, clarity, and stylistic consistency, subject to the author's final approval.

Changes to Authorship

After a manuscript has been accepted, any request for changes to authorship (addition, deletion, or author order) must be made by the corresponding author to the managing editor. The reason for the change should be described, with written confirmation of the change by all authors, including any author being added or deleted.

Publication. Every effort is made to publish accepted articles expeditiously. Authors should address all inquiries regarding this process to the Managing Editor, Ms Olivia Davis (odavis@quintbook.com).

The publisher reserves the right to edit accepted manuscripts to ensure conciseness, clarity, and stylistic consistency, subject to the author's final approval.

Online-Only Articles

The journal reserves the right to publish any accepted article in the online version only. Most technical and case reports will appear only in online format, but they

Permissions and Waivers

- Permission of author and publisher must be obtained for the direct use of material (text, photos, drawings) under copyright that does not belong to the author

Article Sharing

- Twelve months after acceptance, authors can share their accepted (postprint) manuscript via noncommercial platforms (but excluding preprint repositories), such as their institutional repository.
- Authors can share the final PDF of their article with a maximum of 50 addresses/recipients. They are granted a nonexclusive, nontransferable limited license, without right of sublicense, to post this PDF only on their own personal (noncommercial) website, provided that the website has not been created or maintained by or affiliated with any online provider of dental education information or materials.

Study Protocol: Clinical trials must be registered in an acceptable clinical trials registry (clinicaltrials.gov, etc). Please provide the registration number (required for interventional studies). The study's registration number should appear in the manuscript following the abstract. We encourage the registration of observational study protocols.

Reporting guidelines and checklists: These are listed below and can all be readily found at the Equator Network (www.equator-network.org/). Please note that completed applicable checklists and appropriate documentation (flow diagram, etc) should be uploaded with your submission.

CONSORT—For clinical trials (www.consort-statement.org/)

PRISMA—For systematic reviews and meta-analyses (<http://prisma-statement.org/PRISMAStatement/Checklist.aspx>).

SQUIRE—For formal, planned studies designed to assess the nature and effectiveness of interventions to improve the quality and safety of care (www.equator-network.org/reporting-guidelines/squire/)

STROBE—For observational studies in epidemiology (<http://strobe-statement.org/>).

ARRIVE—For in vivo animal research (www.nc3rs.org.uk/arrive-guidelines)

CARE—For case reports (www.care-statement.org/resources/checklist)

MOOSE—For meta-analyses of observational studies (www.elsevier.com/__data/promis_misc/ISSM_MOOSE_Checklist.pdf)

STARD—For diagnostic accuracy studies (www.elsevier.com/__data/promis_misc/ISSM_STARD_Checklist.pdf)

STREGA—For gene-disease association studies (www.equator-network.org/reporting-guidelines/strobe-strega/)

SPQR—For qualitative research (www.mmcri.org/dept-Pages/core/downloads/ORIG/Standards_for_Reporting_Qualitative_Research___A_990451.pdf)

COREQ—For qualitative research (www.mmcri.org/dept-Pages/core/downloads/ORIG/Standards_for_Reporting_Qualitative_Research___A_990451.pdf) (cdn.elsevier.com/promis_misc/ISSM_COREQ_Checklist.pdf).

Adherence to guidelines. Manuscripts not prepared in accordance with these guidelines or written in improper English will be returned with instructions to correct these problems prior to resubmission and review.
