

MANDATORY SUBMISSION AND COPYRIGHT FORM

This Agreement is made by each author signing below, in favor of Quintessence Publishing Company (the "Publisher"), and pertains to:

Title of article: _____

(referred to in this Agreement as the "Work"). The signature of each author below certifies compliance with all the following statements:

Copyright transfer. In consideration of the acceptance of the above Work for publication, I do hereby assign and transfer to the Publisher all rights, title, and interest in and to the copyright of the Work, including all its graphic, photographic, and image-related elements. This assignment applies to all translations of the Work as well as to posting accepted article in electronic form before final publication. If any changes in authorship (order, deletions, or additions) occur after the manuscript is submitted, agreement by all authors for such changes must be on file with the Publisher before acceptance of the article. An author's name may be removed only at his/her written request. (Note: material prepared by employees of the US government in the course of their official duties cannot be copyrighted.)

Author responsibilities. I attest that:

1. The manuscript and all other elements of the Work is original work without fabrication, plagiarism, or fraud.
2. The manuscript and all other elements of the Work is not currently under consideration elsewhere, and has not been posted on a preprint repository site and the research reported will not be submitted for publication or posted elsewhere unless a final decision is made that the manuscript is not acceptable for publication by the Publisher.
3. No part of the manuscript or any other element of the Work violates any copyright, moral right or other right of any third party; all graphic, photographic and image-related elements of the Work are used with permission of any person or entity with rights therein; and I agree to provide the Publisher with written evidence of such permission upon the Publisher's request.
4. I have not previously granted, and will not subsequently grant, to any person or entity other than the Publisher a license, assignment or other authorization of any kind to exercise any rights under copyright relating to the Work. I have not previously participated, and will not subsequently participate, in depositing the Work into any open-access platform or repository.
5. I have made a significant scientific contribution to the study and I am thoroughly familiar with the primary data outlined in the manuscript.
6. I have read the complete manuscript and take responsibility for the content and completeness of the final submitted manuscript; I understand that if the manuscript, or any other element of the Work, is found to be faulty, fraudulent, or in violation of any of my preceding representations, I share responsibility and any potential legal liability.
7. All clinical images included with the manuscript accurately portray the subjects or material photographed and have not been altered or retouched in any way.
8. I agree to the Accepted Manuscript (peer-reviewed but not edited or typeset) being published online immediately after acceptance (note that opting out means that there will be a delay in publication of your article until the final edited and typeset version is published; Accepted Manuscript publication of Editorials, Corrigenda and Errata is not available).

Conflict of interest disclosure. All institutional or corporate affiliations of mine and all funding sources supporting the study are acknowledged. Except as disclosed below, I certify that I have no commercial associations (e.g. consultancies, patent-licensing arrangements, equity interests) that might represent a conflict of interest in connection with the submitted manuscript. Examples of required disclosures can be found on the Quintessence International Disclosure Form.

Experimental procedures in humans and animals. The Publisher endorses the principles embodied in the Declaration of Helsinki and insists that all investigations involving human beings reported in the Publisher's journal articles be carried out in conformity with these principles. Authors reporting on their experimental work in humans or animals should also cite evidence in the Materials and Methods section of the article that this work has been approved by, respectively, an institutional clinical/human experimentation panel or an institutional animal care and use panel (or equivalent).

Signature of each author is required in the same order as on the manuscript title page (Fax or PDF signatures, and multiple forms are acceptable). For more than 6 authors, use an extra sheet.
